STATOTHR

Dear Sir;

Enclosed is a partial page of one of our daily newspapers, "The Press Scimitar", published in Memphis, Tenn.

From time to time we see reports of our military installations all over the country plastered all over our newspapers and magazines. These technical reports, with pictures, concerns me as a private citizen. It occurs to me that all such information should be highly "Classified" information. Should not such information be cleared through your department or the C. I. A. ?

Do you think our enemy nations do the same with their military installations? From this report it would seem that they would only need to subscribe to a few of our daily newspapers and magazines, to get all the information they want about us.

Yours very truly,

STATOTHR
